10/13/67

Dear Mr. Alloway, I'm glad you understand how time presses upon me.

I do not see a third man in those pictures. There stidied them carefully over a long period of time. I have blown the individual Labrader frames up to five feet in widt. Some of them are remarkably class. In one picture what you have marked is tresident Mannedy's laft hand.

I have seen thousands of frames of pictures, taken closet continuously from ove field to the scene of the assassination. I am confident it is no one but President Geomedy on the back sest, no one also there but his wife with him, and I am without any doubt whatsoever that it is Governor Connelly who was wounded.

The remark about fresident Zemedy's size comes from the fact very few people realize he ass a mix fractor. Including to:

Tippit, obviously, sould not have been hill ed ance at the paperitory and again in Oak "liffs.

You can do the same thing tith pictures of almost anyone. Particularly is this easy with the picture I have of dewald, but I have no doubt that it is waveld who was killed by Ruby.

/ir. Thompson's murder map is interesting. However, there is much of it that is taken out of context, too much decending upon unsupported unalegy recollections, too much that ' just cannot agree with.

I so appreciate your taking the time to write and sanding m^{\ast} these things.

Sincerely.
